

Technical Services Overview

GCube. A Partner in Your Success

GCube was established over two decades ago to answer the specific insurance needs of the first wind farms in North America. Today, we are the leading insurance provider to the wind energy industry around the globe. Going beyond insurance, we partner with you to maximize your operational capacity while minimizing the risk and interruption to your wind projects.

Proactive Loss Control. From Start to Finish

GCube is with you at every phase of your wind project. We have technical knowledge and historical data not offered by other providers. This expertise allows us to identify potential challenges before they become an issue.

Equipment Specifications – In-depth understanding of equipment specifications and geographic considerations allows us to identify potential issues caused by local climate variations and wind current patterns.

Operational Performance – Our claims loss data provides valuable insight into operational performance trends and history to anticipate potential risks to your equipment.

Maintenance Programs – We understand the importance of maintenance and upkeep. We proactively work with you to ensure that your wind turbines are performing and continue to run smoothly.

Technical Services Overview

Loss Mitigation. Back Up and Running – FAST

We understand claims happen. When they do, we have the infrastructure and technical experts to promptly address the issue providing innovative ways to restore operational capacity. GCube has partnered with leading service providers to offer repair and replacement alternatives.
